

SKY-MPP-23015 Low-temperature resistant polypropylene masterbatch

Function

1:PP nucleating agent masterbatch provides heterogeneous nucleating agent crystals required for PP, improving its impact resistance. °

2:Provide anti freezing impact strength of PP to improve its impact strength in low-temperature environments. °

3:Nucleating agent masterbatch can improve other physical properties of PP °

Usage amount

Physical properties (heterogeneous nucleating agent content 0.5%)

Notch impact strength of simply supported beams	4.9 KJ/m2	The impact strength of a simply supported beam notch is minus 20 degreeS	<b>3.26</b> <b>KJ/m2</b>
